Subject: TCVP Assessment Revision
Date: Tuesday, May 26, 2020 11:24:24 AM

I wanted to follow-up my phone message from Friday with a written explanation. Registration No. 2596-139 is approved for both cats and dogs and is packaged and sold as a single unit and as a 2 pack. The net weight statement as a results, reflects the weight of 2 collars and not a single collar. I have attached a copy of the most recently approved label. This means that the MOEs for the dog on page 8 Table E2, Residential Exposure Post Application, are incorrect and need to be amended to:

EPA Reg. No./Animal	Lifestage	Application Rate (mg ai) ¹	Animal Size	Liquid Incidental Oral Dose (mg/kg/day) ²	Dust Incidental Oral Dose (mg/kg/day) ³	99.62% Liquid/0.38% Dust Combined Incidental Oral MOE (LOC = 1000) ⁴
2596-139: Dog	Children 1 < 2	3,650	Small	0.0021	0.53	680
			Medium	0.0009	0.225	1580
			Large	0.00055	0.145	2400

These changes are more in agreement to the other dog calculations which contain the same amount of TCVP and are equivalent in length. (This collar does contain an insect growth regulator).

Please confirm your receipt of this email and that the Agency is in agreement since any mitigation would need to include the revised numbers.
